

SWIFIX Fixings Maintenance guide

Having invested in external wall insulation for your property it is important to ensure the guarantees and warranties are protected. If you are looking to fix an item to the outside of your home, then it is essential that these are installed correctly with the approved fixings. The method, type of fixing and plug is different to what you would use for brick or timber.

Our fixings are fully tested and already approved by many of the leading system suppliers, manufacturers and designers.

Contact us via email, phone or through our website for further information and we can then supply the correct fixing for the application. For further peace of mind we can send one of our approved installers to fit your items for you for a small charge, ensuring your guarantees and warranties remain unaffected.

If you require any guidance, please contact us on 01884 560477 or email info@swifix.co.uk

**satellite dishes • waste pipes
fence/gate posts • down pipes • alarms
hanging baskets • lighting**
